

CHOPPING BLOCKS

| | |
|-----------|---------------------------------------|
| 6 LI3 --- | Wood 300h – mm. LxDx940h |
| 6 LI2 --- | Wood 200h – mm. LxDx940h |
| 6 BI8 --- | White polyethylene 80h – mm. LxDx940h |
| 6 RI8 --- | Red polyethylene 80h – mm. LxDx940h |

These are available in thickness of 300 mm or 200 mm and are made of hornbeam treated with natural processes. Furthermore, non-toxic polyethylene blocks suitable for contact with food products are also available. The latter are 80 mm thick and are come in the following colours: white or brick red. The blocks are fitted on a small AISI 304 scotch-brite satin stainless steel stand, equipped with cylindrical legs with 60 mm legs with an adjustable foot and a lower shelf. Block covers in white 25 mm thick polyethylene and cleaning brushes are available as accessories.

BOARDS

| | |
|-----------|--------------------------------------|
| T ---- P | Horizontal fibres wood – mm. LxDx35h |
| T ---- | Horizontal fibres wood – mm. LxDx50h |
| T ---- A | Vertical fibres wood – mm. LxDx120h |
| P ---- | White polyethylene – mm. LxDx25h |
| P ---- xx | Coloured polyethylene – mm. LxDx25h |

These are available in thickness of 35 mm or 50 mm and are made of treated hornbeam with horizontal fibres, or with vertical fibres at a thickness of 120 mm. Furthermore, chopping boards in non-toxic polyethylene suitable for contact with food products are also available. The latter are 25 mm thick and come in the following colours: white, pink, yellow, bright red, green or blue. The wood boards have straight, smooth edges. 35 mm and 50 mm thick boards are equipped with milled sides, making them easier to handle. Polyethylene boards are available with rounded edges and have been fitted with a knocking strip at the bottom.

DUSTBINS

| | |
|-----------|--|
| MN/PD 50 | Dustbind 50 Lt – mm. Ø 400x615h |
| MN/PD 70 | Dustbind 70 Lt – mm. Ø 400x720h |
| MN/PD 90 | Dustbind 90 Lt – mm. Ø 400x855h |
| PS 70 | Bag holder 70 Lt – mm. Ø 475x850h |
| CQ 50 POL | Drum with lid and trolley – mm. Ø 530x900h |

The dustbins are very sturdy, liquid-tight and have wheels, lids and lifting handles on the sides. Version "MN" has a lid that can be opened by hand, while version "PD" has a pedal lid. The rubbish bag container has a pedal lid, is on wheels, and comes complete with an elastic rubber ring. The bin has been designed with white polyethylene with handles, just like the lid, and is positioned on a flat stainless steel trolley with wheels.

KNIFE STERILIZER

| | |
|----------|---|
| STN --10 | Immersion - neutral – mm. Lx100x360h |
| STE 3014 | Immersion - heated – mm. 270x110x400h |
| STE 2711 | Immersion - heated - thermometer – mm. 270x110x400h |
| STE 4020 | Immersion - heated – mm. 380x200x400h |
| STE 3820 | Immersion - heated - thermometer – mm. 380x200x400h |
| STU --10 | Ultra-violet – mm. Lx200x700h |

These units are used to sterilize knives and other implements and are offered in three different versions: neutral immersion, heated to 83 °C and with UV-A rays. The heated and UV-A versions are 220V, single-phase powered. Immersion models have a tap to open the drain and a polyethylene grill to position the knives. The UV-A model has a magnetic bar to hold the knives.

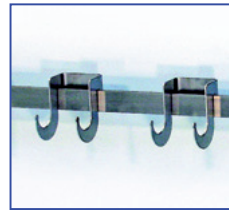

WALL HANGERS AND MEAT TROLLEYS

| | |
|------------|----------------------------------|
| 67 10 5 -- | Hanger – mm. Lx113x113h |
| C 120 T | Meat holder – mm. 1200x600x1550h |
| CS 13 | Tank 130h – mm. 520x700x900h |
| CS 20 | Tank 200h – mm. 520x700x900h |
| CS 30 | Tank 300h – mm. 520x700x900h |

The wall hangers are comprised of a flat 40x10 mm steel bar that is mounted on sturdy wall-mounted supports and can come complete with double U-shaped hooks. All items are in AISI 304 stainless steel.

The meat trolley has 125 mm rubber wheels with a stainless steel support. It has 5 hook bars and an extractable lower collection tray with a drain. Series "CS" trolleys have a tubular base containing an extractable, liquid-tight tray and two side handles.

TRAY TROLLEYS AND LABORATORY TROLLEYS

| | |
|-----------|--|
| G -- V | For 410x610 trays open – mm. 470x660xH |
| A -- V | For 410x610 trays closed – mm. 470x660xH |
| L/G --0 T | 3 smooth/gridded shelves – mm. Lx600x1650h |
| V --0 T | 3 extractable tray – mm. Lx600x1650h |
| P --0 T | 3 dripping shelves – mm. Lx600x1650h |
| CPS -- | Shelf trolley with handle – mm. DxLx900h |

A series of trolleys to transport trays of any type, suitable for any need which can also be supplied with 410x610 mm stainless steel meat trays.

They can be smooth, gridded, with extractable, liquid-tight trays, or gridded to drain work equipment on the extractable collection tray located underneath it.

The shelves are made of reinforced stainless steel sheets with a 25 mm thick stainless steel tube handle and rubber wheels, and are equipped with high sides to support the material being carried.

SAUSAGE TROLLEYS AND SMALL SHELVES

| | |
|-----------|--|
| 64 CS 210 | 2 levels sausage holder – mm. 1060x950x1800h |
| 64 CS 310 | 3 levels sausage holder – mm. 1060x950x1950h |
| 64 PS 112 | Single rack – mm. 1160x800x2350h |
| 64 PS 212 | Double rack – mm. 1160x800x2350h |
| 64 BP 128 | Salting bench – mm. 1160x800x2350h |
| -- P6040 | Flat box holder trolley – mm. 615x415x140h |

All designed in AISI 304 stainless steel with a particularly sturdy structure, making them suitable for use both in large sausage, cold cut and ham making factories as well as in small, artisanal workshops.

The sausage trolleys have 125 mm rubber wheels with stainless steel supports and are completed with star-shaped stainless steel ribs. The salting table can be fitted with stainless steel shelves and a polyethylene block.

Drawer shelves are fitted with edges to steady the material being transported.

SORTING AND ROLLER TABLES

| | |
|-------------|--|
| T --0 B | Selection table – mm. Lx700x900h |
| TC --0 | Meat processing table – mm. Lx700x900-1700h |
| MH --- -- | Mixed Top – mm. LxDx900h |
| 2 R -00 | Roller table with 2 levels – mm. Lx500x820-1520h |
| 1 R -00 | Roller table with 1 level – mm. Lx500x820x1520h |
| 66 R- 100 R | Revolving table – mm. Ø 1000x900h |

Product and workspace optimisation and industrialisation can all be achieved with a number of specific solutions, useful both to large industries and small workshops.

Sturdy selection and worktables have been specifically designed and equipped for this purpose. Roller tables with one or two shelves with non-toxic plastic rolls. Tables with rotating, motorised and gravity tops. All designed in AISI 304 scotch-brite stainless steel.
